Rusla, Kiev, 1957 [187p.].

DESCRIPTORS: *Estuaries, *Inland waterways,
*Hydraulic research, Fluid flow, Turbulence,
Turbulent flow, Laminar boundary layer.

General equations for turbulent flow in the bend of a
wide river-bed are derived. Formulas are obtained
for computing the components of transverse circulation
in wide riverbeds with smooth or rough bottom. A
method is given for computing the development and
decay of circulation, for the distribution of longitudinal
velocity components in the bend and beyond it. A
